EDUCATION

**RVS COLLEGE OF ENGINEERING
AND TECHNOLOGY**

Electronics and Communication
Engineering | Bachelor of
Engineering

06/2018 - 06/2022

SKILLS

- Arduino C++
- Microcontroller Programming
- PCB Design
- RTOS
- I2C/SPI/UART Protocols
- Hardware Design
- Analog & Digital Circuit Design
- Debugging
- Problem-solving

PROFILE

As an experienced embedded engineer with 3+ years in the field, I have a proven track record of success in designing and developing efficient and reliable embedded systems. I have extensive experience in programming languages such as C, C++, and assembly language, along with proficiency in hardware design and testing. My biggest achievement has been successfully leading the development, which was recognized for its innovation and received [award/recognition]. Demonstrated strong problem-solving ability by identifying and resolving complex system issues, leveraging keen attention to detail to ensure efficient troubleshooting. With my strong technical skills, dedication, and passion for embedded systems, I am confident in my ability to make valuable contributions to any project or team.

WORK EXPERIENCE

SUN BIO IT SOLUTIONS PVT LTD

Embedded Engineer

2022 - PRESENT

- As an embedded engineer at SUN BIO IT SOLUTIONS PVT LTD, I developed and implemented embedded systems for diverse projects, collaborating with cross-functional teams, designing and testing software and hardware, and troubleshooting issues to ensure reliability and high-quality outcomes.

My role involved designing and testing embedded software and hardware, as well as troubleshooting and debugging issues to ensure optimal functionality.

- Collaborated with cross-functional teams to develop embedded systems, resulting in improved product performance and streamlined project delivery.
- Conducted thorough testing and debugging to ensure high-quality products
- Designed and implemented efficient and reliable embedded software
- Contributed to the development of innovative solutions for client projects
